6BUIS018C – Information Driven Entrepreneurship and Enterprise

Lecture 1 – Introduction

Module Content

- **What this module is about…**
- focus on business ideas that are associated with information driven innovations and look at creating [your] business start-up that supports this
- The module theme is based on and will support some of the major developments and issues in entrepreneurship and enterprise, underpinned and supported by information communication technologies. It will also encourage a mindset in creative thinking when seeking opportunities for new *information driven* start-ups and provide an assessment of their impact…

How will the module be run?

- **Module operation**
  - 12 learning week duration including the Employability Week (LW6)
    - Learning through lectures – including a question-and-answer session, and further supported through tutorials
    - Additional reading will enhance your understanding and application

Assessment information

- **Assessment**
  - 100% coursework (50% group work, 50% individual)
    - Both CWs have a close association
    - no exam or in-class test
- **Opportunity for formative feedback based on work demonstrated through some tutorials**

Assessment information

Module weighting:

Coursework 1: 50%

Coursework 2: 50%

Coursework 1: 50% (Group work)

Deadline: 05.03.2026

Coursework 2: 50% (Individual)

Deadline: 09.04.2026

Dave Chaffey, Tanya Hemphill, and David Edmundson-Bird:
Digital Business and E-Commerce Management, ***7th ed.***
Pearson Education, 2019.

Essential: Chapters 1-2

Recommended: Chapters 3-4

Book is available on-line via the Library Webpage.

Entrepreneurship

– "Entrepreneurs use innovation to exploit or create change and opportunity for the purpose of making profit."

Burns Paul., (2011), *Entrepreneurship and small businesses, Start-up, growth and maturity*, Third Edition, Palgrave Macmillan

– An entrepreneur is [normally associated with] an owner or director of a business who will 'attempt' to earn profits through taking business risks and through their own initiatives

Entrepreneurship and business

- Entrepreneurship
  - Process of beginning a business venture
  - Organizing the essential resources
  - Responsible for associated risks and rewards

- What is business?
  - **For profit:** A business or enterprise is an organisation engaged in the trade of goods or services, or both, to customers to earn **profitable income** for the owners of that business or enterprise
  - **Non for profit:** purpose is **something other than to make private profit** for directors, members or shareholders. Typically supports a community.

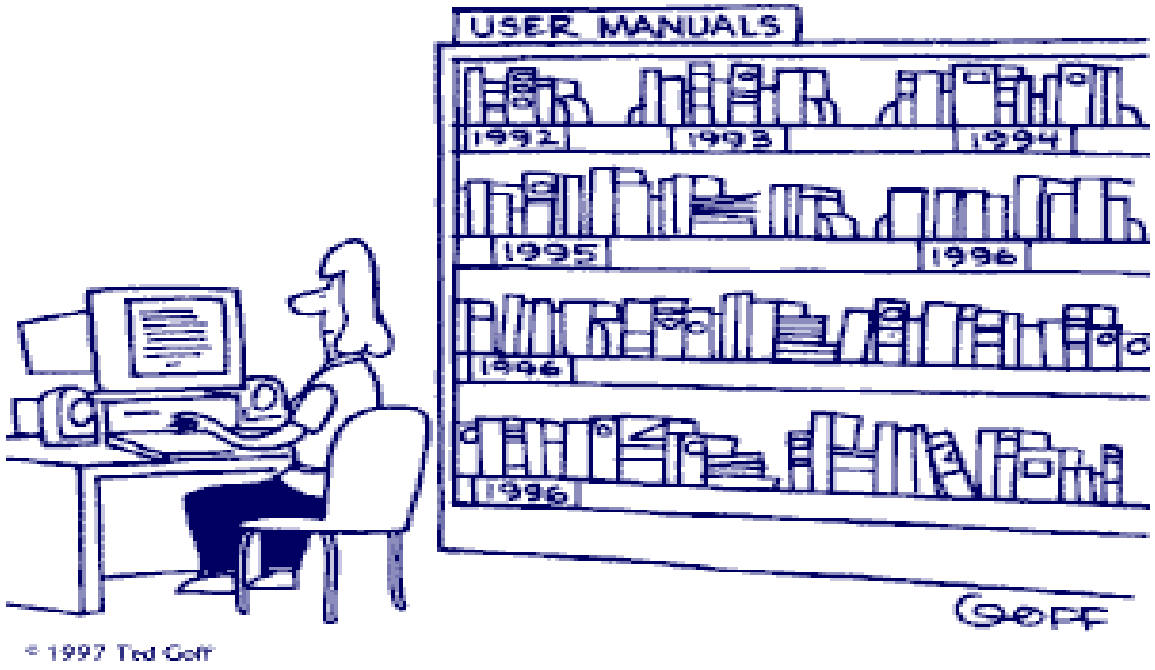

- What is small business?
  - A small business is a business that is usually privately owned and operated, with a small number of employees and generates a relatively small volume of sales.

Entrepreneurship

- **Advantages**
  - ✓ Be your own boss
  - ✓ Challenge, excitement
  - ✓ Your own liking/disliking
  - ✓ Possible tax benefits
- **Limitations**
  - ✓ Responsibility
  - ✓ Financial risk
  - ✓ Anxiety and stress
  - ✓ Requires dedication and full commitment

…from humble beginnings… a major paradigm shift

- … and so along came – the Internet and the WWW

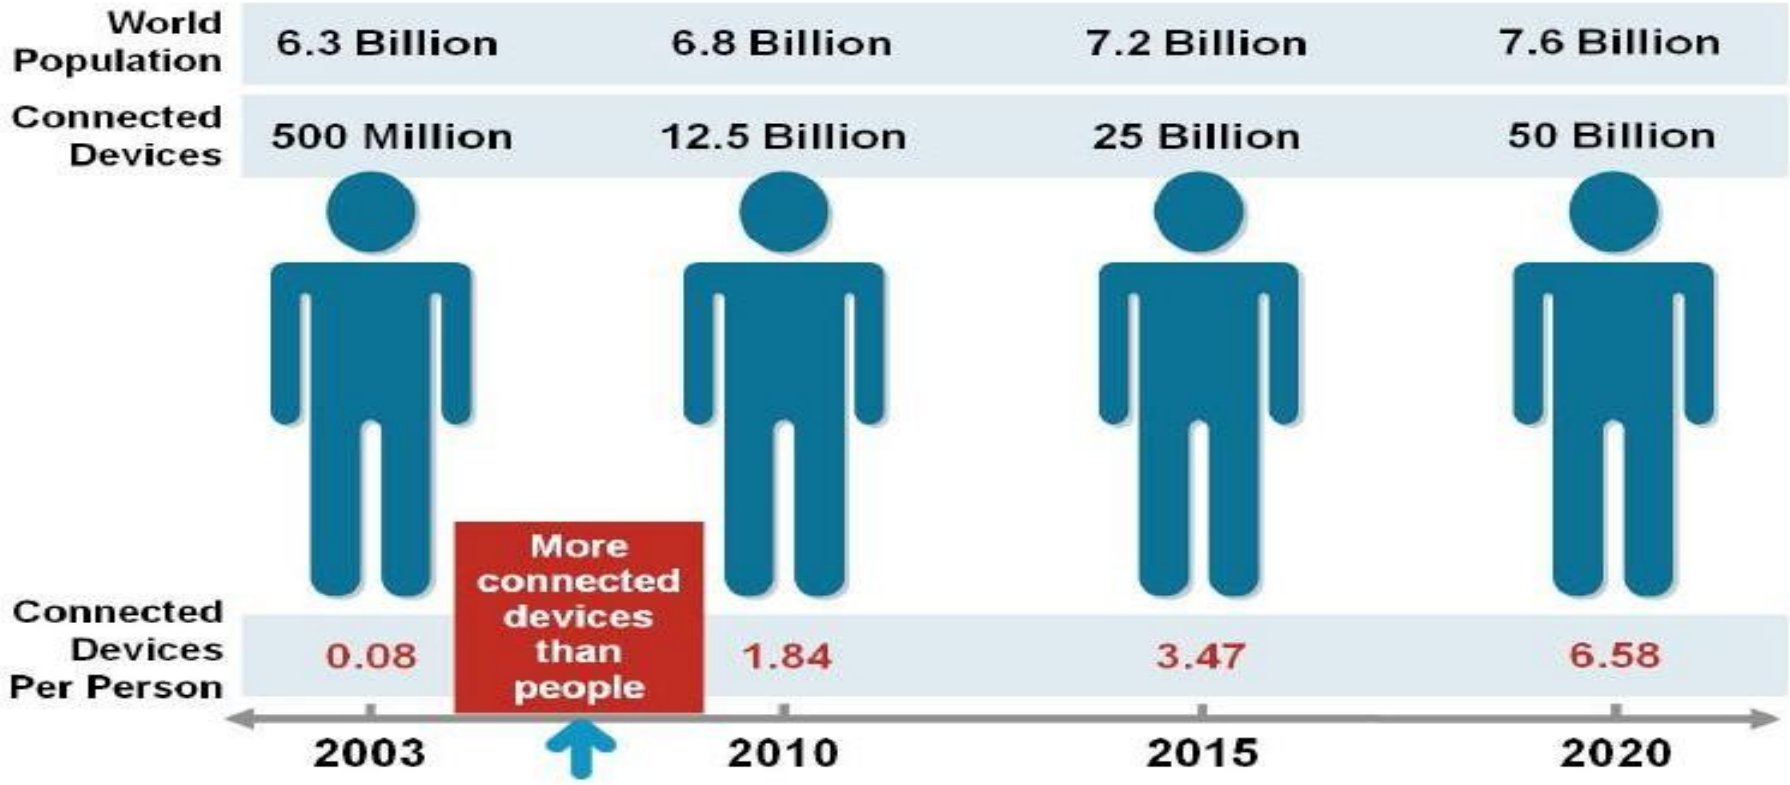

Everybody and everything is connected

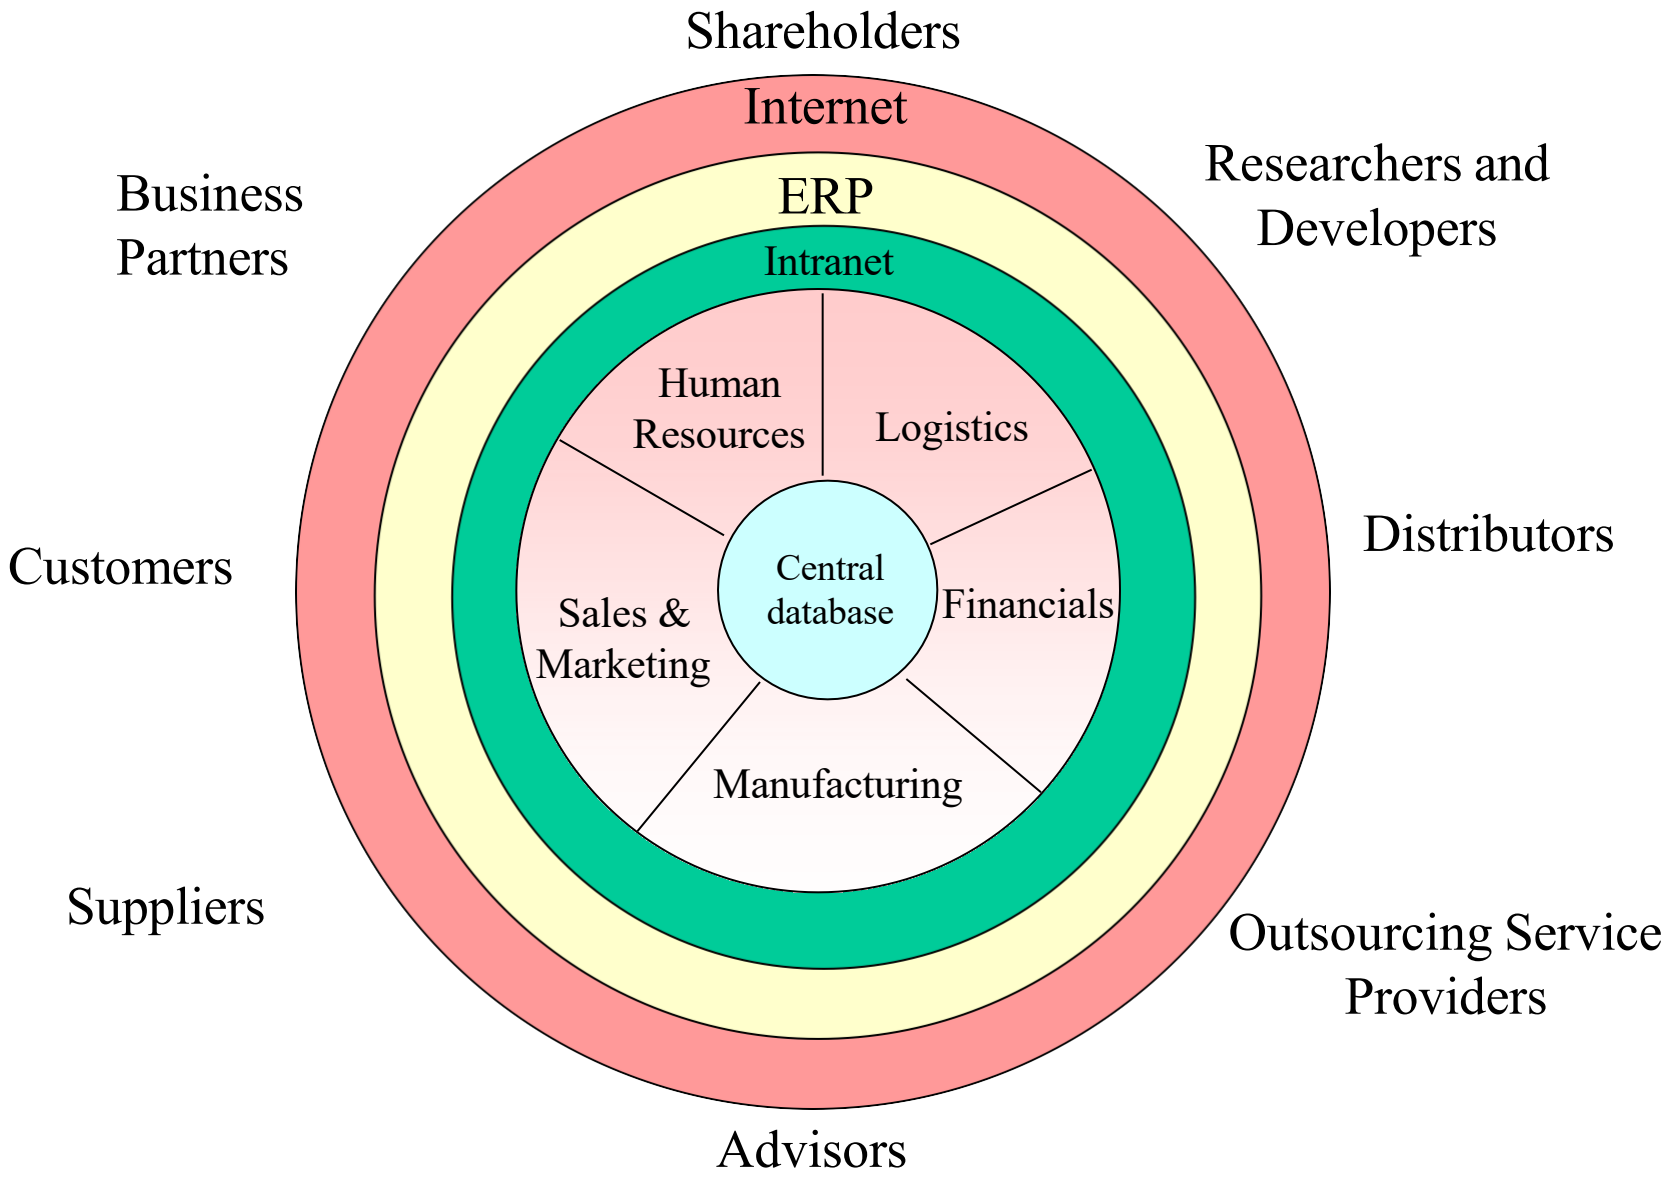

Huge business opportunities

How do businesses/enterprises use networks and computing?

ERP: Enterprise Resource Planning

E-business and e-commerce defined

There are no universally accepted definitions – terms used interchangeably

E-commerce:

where business transactions (financial and non-financial) take place via telecommunications networks, especially the Internet

buying and selling of products, services, and information via computer networks including the Internet

E-business:

The transformation of key business processes through the use of networking and Internet technologies

E-business describes the broadest definition of EC. It improves business performance by using electronic information technologies and open standards to connect suppliers and customers at all steps along the value chain.

E-business is more than EC transactions, it is the overall strategy of redefining old business models, with the aid of technology, to maximise customer value and profits.

Buy-side and sell-side e-commerce

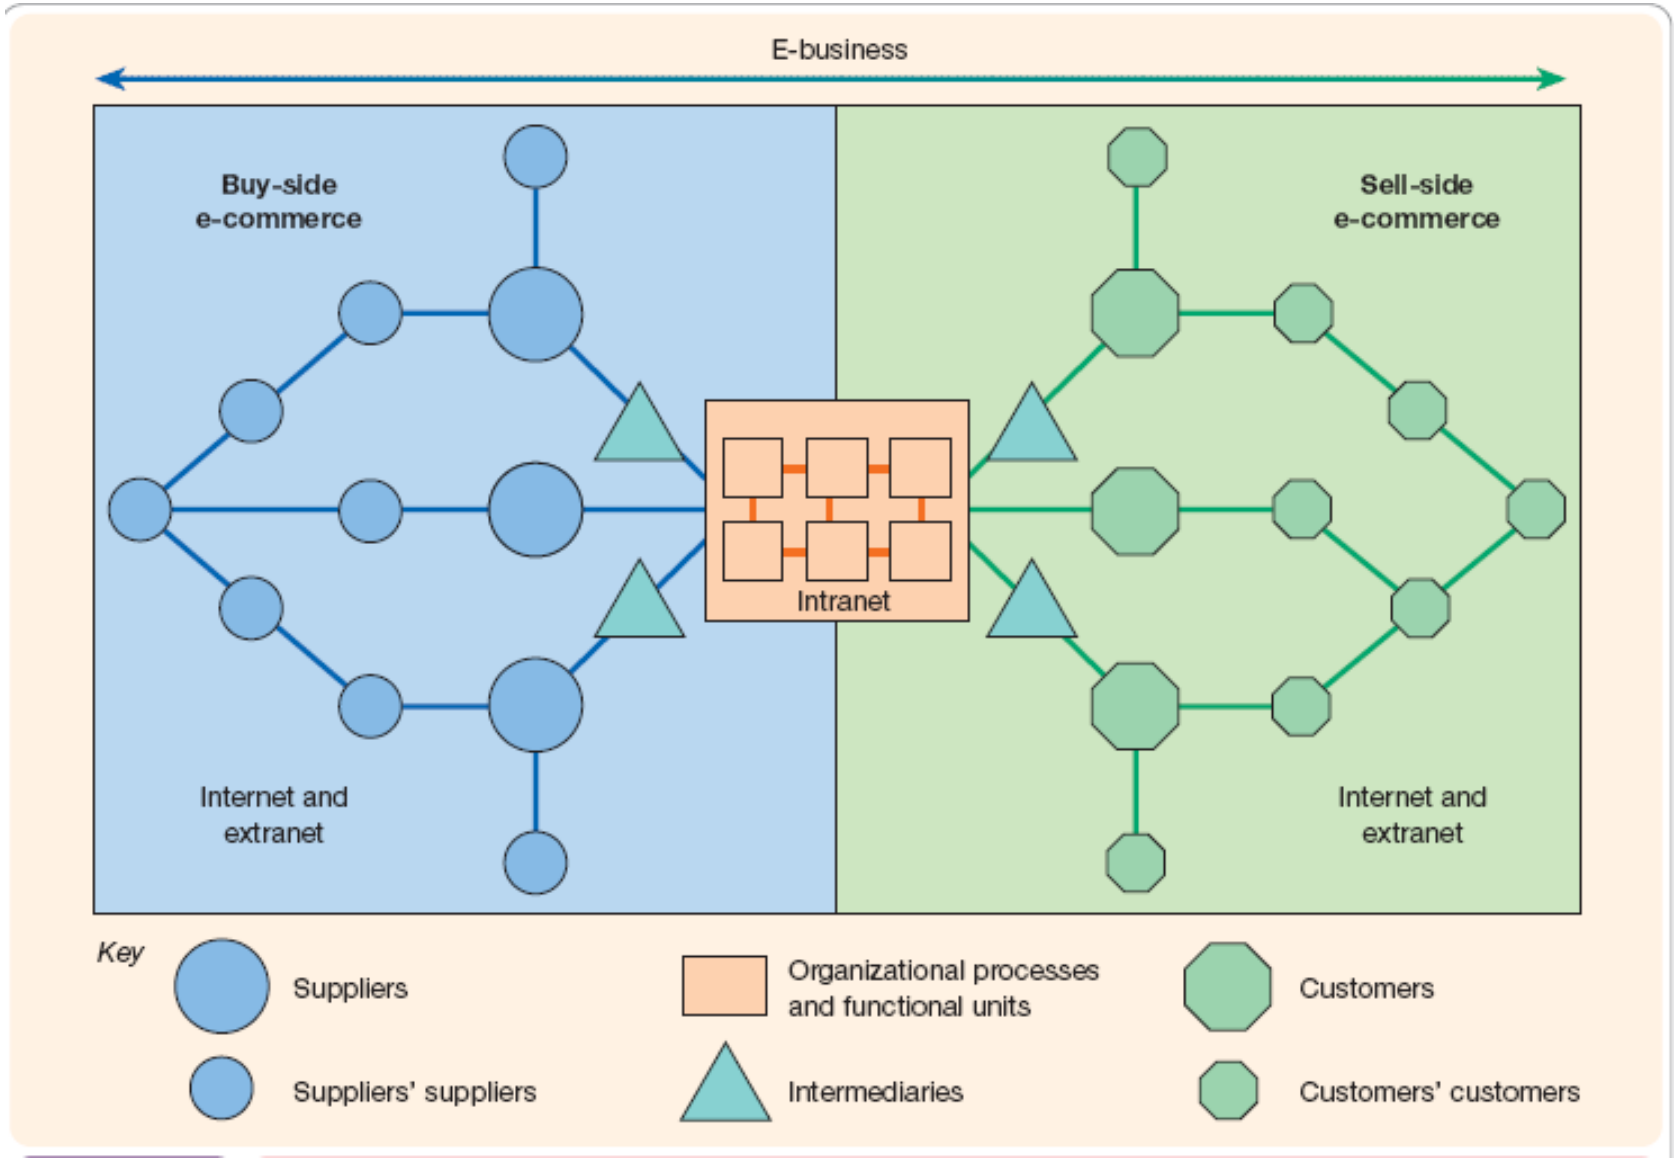

Buy-side e-commerce:

- Transactions to procure resources needed by an organisation from its suppliers

Sell-side e-commerce:

- Transactions involved with selling products to an organisation's customers

E-business and buy-side and sell-side e-commerce

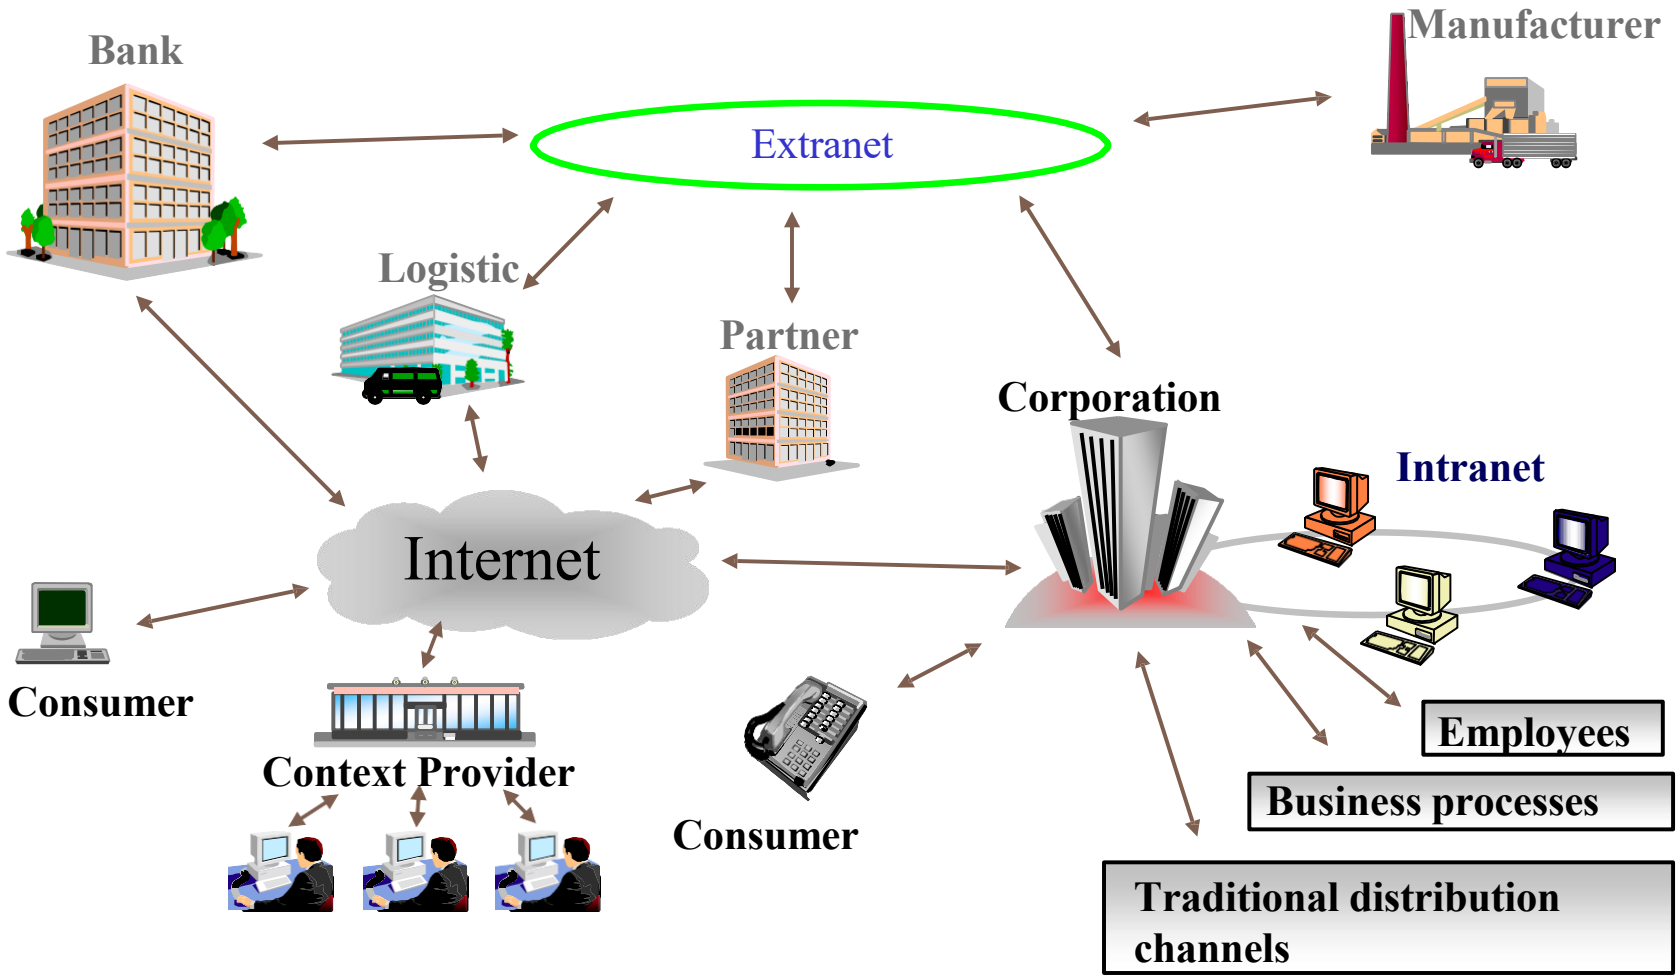

Source: Chaffey 2009

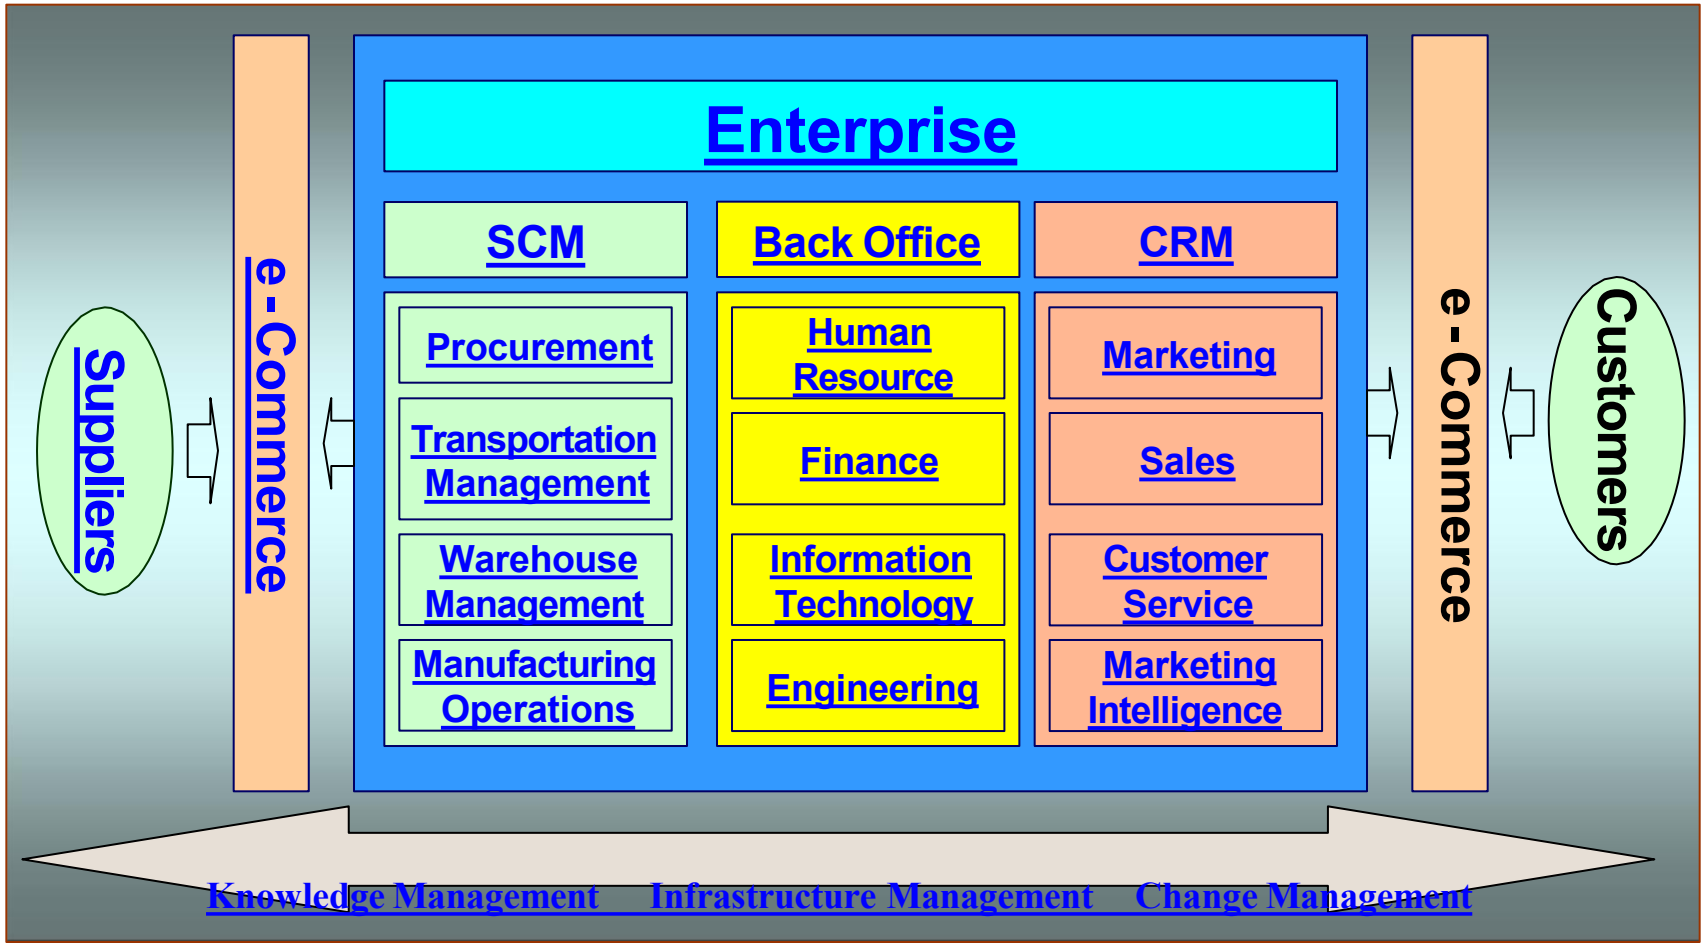

The 4 phases of utilising networking technology for business purposes

1. **Brochureware:**
   - the Internet is only used as a marketing tool through a static website
2. **Electronic commerce**
   - selling and buying goods on-line
3. **E-business**
   - intensive relationship between business partners through the network
4. **E-enterprise**
   - the whole value chain – from procurement of raw materials to customer relationship management – happens by combining traditional methods and networking technologies

The Complexity of E-Business

Components of E-Business

Source: Shaw, Michael. "Building an E-Business from Enterprise Systems." *Information Systems Frontiers*, 2000. Pgs 7-17.

Explanation: SCM: Supply Chain Management

CRM: Customer Relationship Management

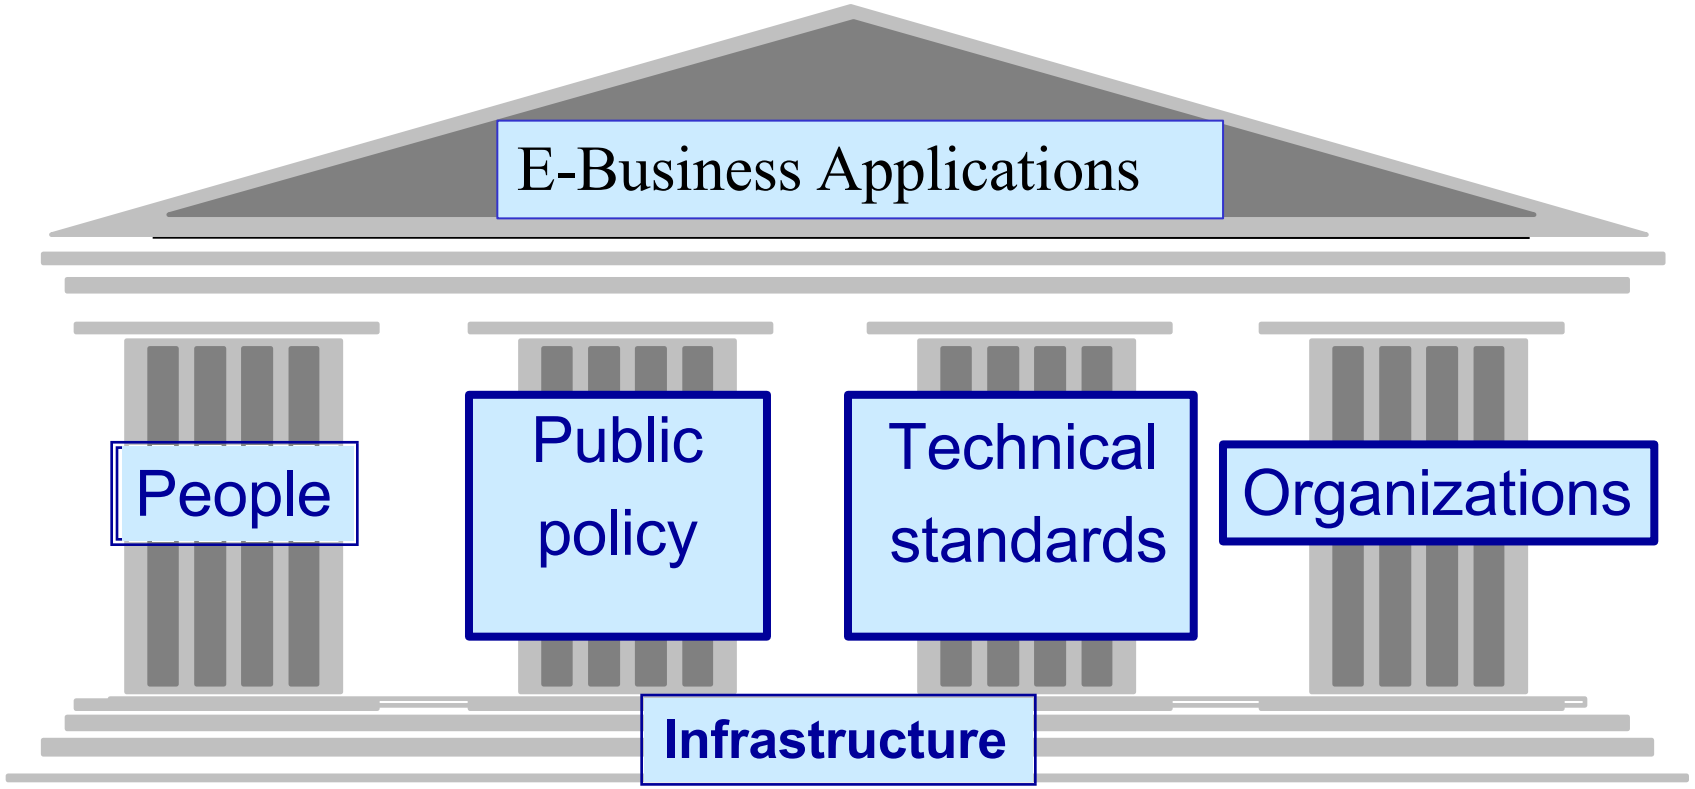

Stakeholders of Electronic Business

(Entities who are affected by it)

- Government authorities
- Companies, organisations
  - Banks and other financial institutions
  - Manufacturers
  - Distributors
  - Retailers
  - Logistics providers (transportation, warehousing, etc.)
  - IT providers
  - other organisations
- Individual customers

A Framework for E-business

Common business services	Messaging and information distribution	Multimedia, network publishing	Network infrastructure	Interfaces

Management
