# 6COSC020W Applied AI

Software required for the module

# Software

- We will primarily be using **python** in this module.
- Additional libraries (numpy, pandas, jupyter…) can be installed using **pip** as needed.

- **Anaconda** is a convenient way to install python, jupyter notebook, and most libraries that will be needed for the module.

- **Matlab** will also be referenced during the module. Matlab is available from Appsanywhere.

# Python

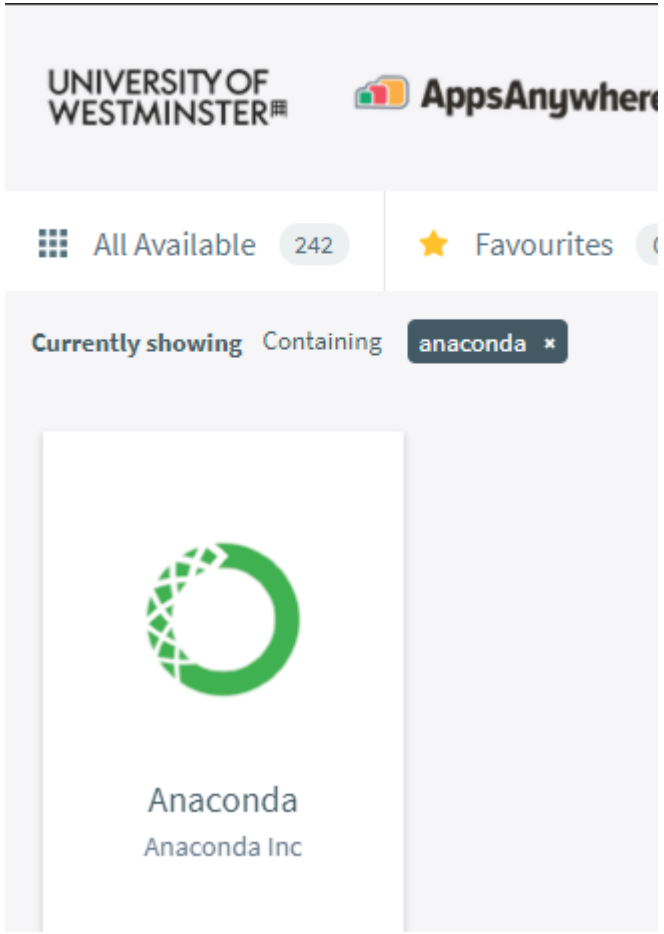

- There are many ways to install and use Python. Most of you have a preferred method and you are free to use whatever suits you.
- You will find installation instructions for your platform from here:
- https://www.python.org/downloads/
- Additional libraries can be installed when needed using pip.

```
pip install numpy pandas scikit-learn tensorflow
```

# Anaconda

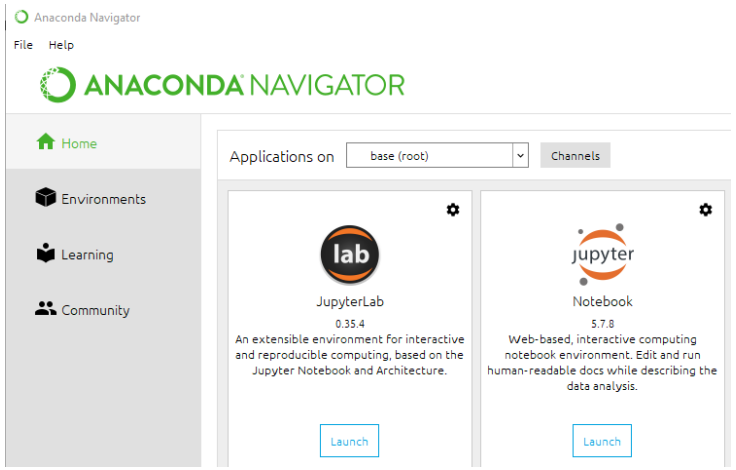

- Anaconda is available for through Appsanywhere.
- You may prefer to download Anaconda Individual which is free.

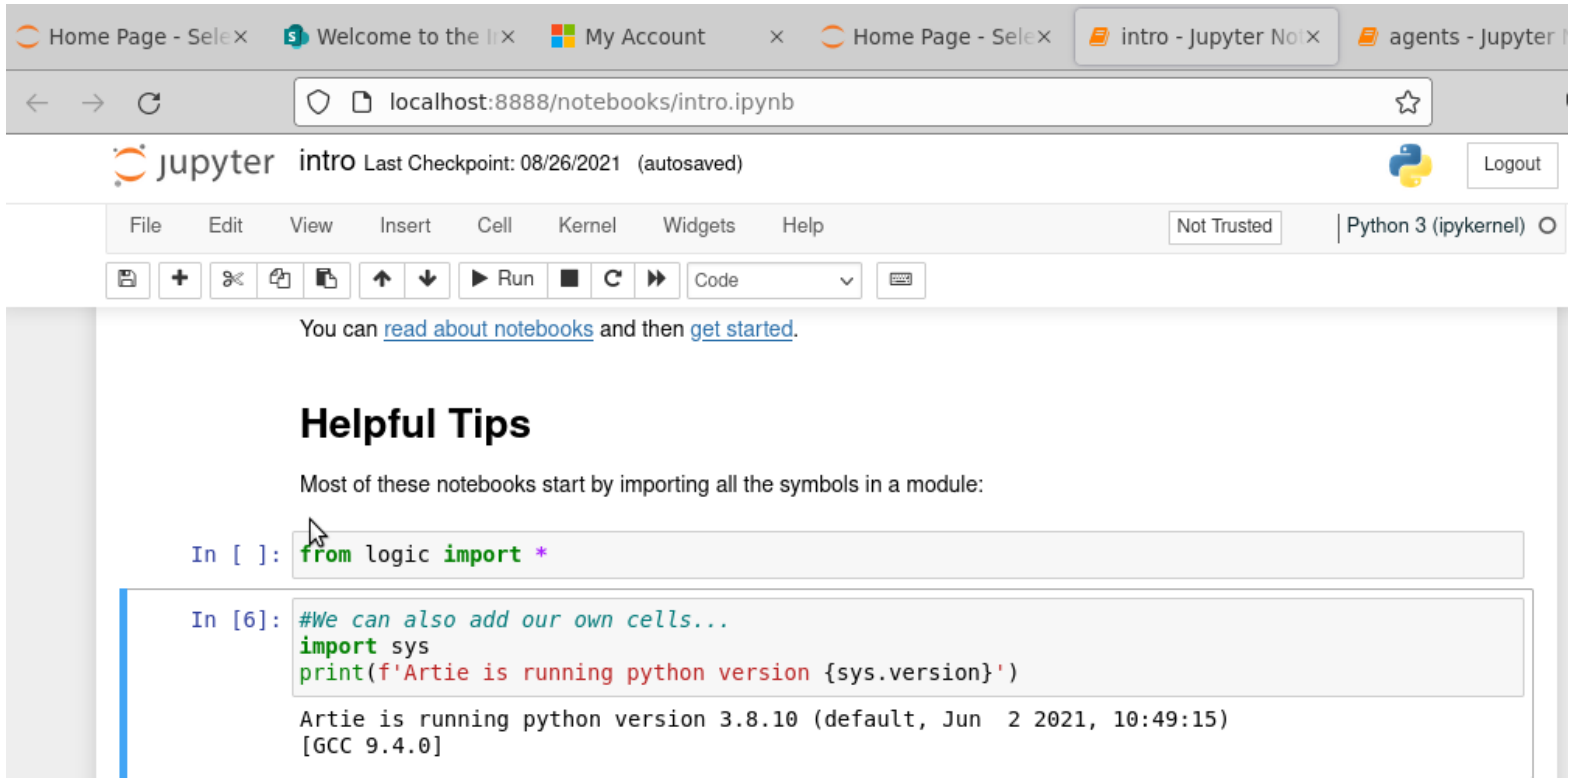

https://www.anaconda.com/products/individual

# jupyter notebook

- Web –based, interactive notebook environment used for the  examples.

# Matlab

- Matlab is available from appsanywhere.
- The university purchased a campus Total Academic Headcount license for Matlab if you wish to install it on your PC.
