6COSC020W Applied AI

Tutorial Generative AI (genAI)

Aim**:**

- Review genAI concepts.
- Experiment with TensorFlow and generative AI.
- Fine-tune a GPT2 model
- Train and evaluate a generative adversarial network.

1.- Define using your own words the following concepts:

Variational auto-encoder, generative adversarial network (GAN), transformer, domain adaptation.

2.- Fine-tuning a GPT2 model

Download the file *LLMs_tutorial.ipynb* from Blackboard and run the code.

Answer the questions.

3.- Generate images of numbers

Download the file *GAN_tutorial.ipynb* from Blackboard and run the code.

Answer the questions.
